

Copy Protect

Easy, Convenient, Highly Secure

What is Copy Protect?

Copy Protect is unique software that lets you copy protect your audios, videos, documents and pictures so that they cannot be duplicated, copied or distributed by illegal means. It is the only tool that lets you fight the piracy of your media files like audios, videos, pictures and documents (lots of formats supported). Copy Protect converts all supported formats into executable applications that run only in the drives they are prepared for. If these files are copied to another drive, they do not run and become useless.

These executable applications do not require any administrative rights to run and therefore there is no need to install Copy Protect at the other end to play copy protected media files. Furthermore, the program comes with a special built-in picture and document viewer that lets you view and read your copy protected files; and a built-in player for your copy protected videos and audios. With Copy Protect's playlist option, you can also organize and manage all your media files.

Copy Protect gives you the portability of protected files so that you can distribute them without any fear of data being copied illegally. Copy Protected files can be burnt on CDs and DVDs or copied to USB drive and external drive(s). No other copy protection software offers such remarkable features.

Once burned or saved to the destination drive, these files can only be run from that particular drive. If someone tries to play protected files after copying them to another location, these files will not run. In this way, you can prevent piracy, plagiarism and illegal distribution of your media files.

Copy Protect works perfectly on all 32-bit and 64-bit versions of Windows 7, Windows Vista, Windows 2008 Server, Windows XP, Windows 2000 and Windows 2003 Server and it is also compatible on all file systems like FAT, FAT32 and NTFS.

Using Copy Protect Documentation

Clicking a topic in the left panel will display all relevant information about that topic. All topics are explained in detail and are all accurate and up-to-date.

Copy Protect Requirements

Supported platforms for Copy Protect are Windows 8 (all variants), Windows 7 (all variants), Windows XP 32-bit, XP 64-bit, Vista 32-bit, Vista 64-bit, Windows 2000, and is compatible on all file systems like FAT, FAT32 and NTFS.

Benefits of Using Copy Protect

Copy protection means preventing illegal and fraudulent copying of your data contained in the CD, DVD, USB drive, external drive or any such medium. Although there are copyright laws in existence today but still copy protection is a much needed requirement as CD/DVD duplication and piracy has become a rampant business. It has been admitted that unauthorized copying and piracy causes unthinkable harm to your business or even to your reputation.

Copy Protect is a data copy protection software that uses advance level of steganographic technology to copy protect your media files like videos, audios, pictures and documents. It is a complete protection system that is strong, easy to use and very effective against tampering of any kind.

With Copy Protect, you can distribute your copyright material and sensitive documents, reports, videos and audios, and can also provide a preview of your photos, pictures, graphic designs or plan draughts without the client being able to copy in any away. In this way, you can prevent piracy and illegal distribution of your media files.

- Copy Protection:** Copy Protect uses advanced level of copy protection technology that cannot be tampered in any way which means your copy protected data is completely save from illegal copying and piracy.
- Easy to use:** Copy Protect has a user-friendly graphical user interface that requires no expert technical know-how for operation. It is very easy to navigate and use.
- Accessibility:** The program offers you a hassle free way to view, play and read your copy protected pictures, audios, videos and documents because it comes with special built-in player for your videos and audios, and a viewer for your pictures and documents.
- Peace of Mind:** Total peace of mind from security leaks and privacy breaches. Never again fear of what's happening to your CD, DVD or USB drive while it is being used by someone else.
- Portable Application:** Copy Protect is unique because it creates copy protected applications which are portable. It means no need to install the program at the other end to run copy protected files.
- No Administrator Rights Required:** Copy Protect does not ask for any special privileges to run the copy protected application. It does not require administrator rights to play copy protected videos and audios or to read copy protected files and documents.
- Increased Revenue:** Increase your revenue with Copy Protect by preventing illegal copying, piracy and duplication of your copyright materials.
- Prevent Image Theft:** Now with Copy Protect, you are in full control to prevent your images and

digital pictures from being theft or copied illegally. Now you can furnish a sample of your digital pictures, art work, graphic designs or plan draughts without the client being able to copy them.

Affordability: Copy Protect works well without having to shed thousands of dollars. It is cost-effective and reliable at the same time.

Increased Productivity: With Copy Protect, you don't have to work on useless methods and crippling features, watermarks etc to deal with piracy related issues. Copy protect all your creative material and other important documents without shedding thousands of dollars.

Compatibility: The program is compatible with Windows XP 32-bit, XP 64-bit, Vista 32-bit, Vista 64-bit, Windows 7 (all variants), Windows 8 (all variants), and is compatible on all file systems like FAT, FAT32 and NTFS.

Copy Protect - Outstanding Features

Companies and other corporate groups that prefer to publish and distribute their works under copy protection generate greater revenue. This is because of the reason that the added expense of implementing copy protection has been counterbalanced by the increased revenue and ROI which have been generated by thwarting illegal distribution and piracy of media files.

Copy Protect is a unique application that lets you prevent piracy and illegal distribution of your copyright material and CDs/DVDs. It is a special data copy protection software that does not allow copying and duplication of your protected videos, audios, pictures and files in any way.

Some of the features of Copy Protect are listed below:

- Unbreakable copy protection for your videos, audios, pictures and documents.
- Burn copy protected data to your own CD or DVD for distribution without the fear of data being copied illegally.
- Easy to use and navigate graphical user interface that does not require any additional programming skills.
- Simple and effective data copy protection procedures.
- Protect your media files and art work from illegal copy from one computer to another.
- Securely distribute your films, songs, files, documents, reports and other copyright material on any distribution media like CD, DVD, Blu-ray disc, USB drive, external drive etc.
- Highly customized copy protection application to tailor your needs.
- Play copy protected videos and audios directly from the destination drive where you have saved them.
- No need to install the application at other end to run the copy protected files and documents.
- Prevent image theft, piracy, illegal distribution and leakage of your data from your CD/DVD or USB drive to any other drive.
- Work well with Windows XP 32-bit, XP 64-bit, Vista 32-bit, Vista 64-bit, Windows 7 (all variants), Windows 8 (all variants).
- Fully compatible on all file systems like FAT, FAT32 and NTFS.

Answers:

Q1. What is Copy Protect?

Copy Protect is unique software that lets you copy protect your digital media files so that they cannot be duplicated, copied or distributed by illegal means. It is the only tool that lets you fight the piracy of your media files like audios, videos, pictures and documents (lots of formats supported). Copy Protect converts all supported formats into executable applications that run only in the drives they are prepared for. If these files are copied to another drive, they do not run and become useless.

↳ [See top](#)

Q2. How does it work?

Copy Protect works by converting your videos, audios, photos and documents into copy protected executable applications with the same filename. You can then burn these copy protected executable applications to your CD, DVD, Blu-ray disc or can save them to your USB drive, external hard drive

etc. Once burned, you can distribute it without the fear of data being copied illegally because if these files are copied to another drive, they do not run and become useless.

▲ [See top](#)

Q3. On what type of medium I can protect my data?

You can choose either a local drive location, portable drive location or a CD/DVD drive where you want your copy protected files saved. Once this is done, you can freely distribute that drive or CD/DVD to anyone without the fear of data copy or duplicate.

▲ [See top](#)

Q4. Can I copy protect CDs?

With Copy Protect, you can achieve what you want without any expensive hardware. Simply select the supported files format that you wish to copy protect and the program converts them to copy protected executable application which can be burned on CD/DVD or you can save them to a portable or fixed drive. In this way, your CD or DVD where you have burned copy protected applications will become completely copy protected.

▲ [See top](#)

Q5. How to install Copy Protect?

Copy Protect is an easy to use and install software. Download Copy Protect latest version on your computer from <http://www.newsoftwares.net/copy-protect/> and run the installation setup that will guide you through the process of installation.

Note: Only System Administrator can install Copy Protect.

▲ [See top](#)

Q6. Can I install Copy Protect if I do not have administrative rights?

No, you cannot install Copy Protect if you do not have administrative rights. Only System Administrator can install the program.

▲ [See top](#)

Q7. Do I need any special software to run copy protected application?

No, you do not need any special software or utility to run the copy protected applications because Copy Protect comes with built-in Viewers and Players that let you play your copy protected videos and audios, and allow you and other users to view and read copy protected pictures and documents.

◀ [See top](#)

Q8. Will the application also burn copy protected videos and audios to my CD or DVD?

Yes, Copy Protect is unique because it not only copy protect your media files but also lets you burn them to your own CD or DVD so that you can distribute it without any fear of data being copied illegally.

Kindly note that once burned to a particular drive, your copy protected files will only work if being played from that drive. However, if these files are copied to another drive, they do not run and become useless.

◀ [See top](#)

Q9. Is Copy Protect free or a Shareware?

Copy Protect is NOT freeware! It is shareware, which means you can try it before buying. We give you trial version so that you can test the program and check whether it is useful for you or not. If you find it useful and want to keep it, register your copy and get a full version registration key via email in minutes.

Kindly note that when you're protecting your media files using Trial version of Copy Protect, watermarks will be added to your videos, pictures and documents, and interruption in your audios. Therefore, it is highly recommended that you register Copy Protect.

◀ [See top](#)

Q10. Can I buy the program without first trying the evaluation version?

You could, but please don't. We don't need your money as much as we need your satisfaction. It is strongly recommended that you try the software first before purchasing. If you are happy with it, then pay us and register.

◀ [See top](#)

Q11. How can I suggest a new feature for the future releases?

We give high priority to our customers' suggestions for future versions of our software. If you have a feature request, be sure your copy is registered and let us know via Contact Us form.

◀ [See top](#)

Q12. What's the difference between trial and full version? What are the benefits of registering?

Registered users will get:

- A Full version to download that does not have any trial limit.

- No trial reminders, no functionality limits.
- No watermarks and interruptions in your copy protected data.
- Life-time priority customer supports.
- Free Upgrades to all minor versions of Copy Protect.
- Ability to copy protect unlimited data for unlimited period of time.
- Ensures complete privacy leaving no future headache.
- Feature requests will be welcome.
- No hidden or subscription charges at all.
- Total peace of mind from security leaks and privacy breach.
- A personal Thank you message from the developers of the product.

▲ [See top](#)

Q13. Can I order online using my Credit Card or Paypal?

Sure. You can use either your credit card or Paypal to buy the full version of Copy Protect online. Click the 'Register' link on the program and then click 'Buy Now'

▲ [See top](#)

Q14. Which Credit Cards do you accept?

We accept most Credit Cards like VISA, Master Card, EuroCard, American Express, Discover, Novus, Diners Club, Carte Blanche, JCB, Switch and Solo.

▲ [See top](#)

Q15. Is your order site secure? Is my Credit Card information safe on this site?

Your payments are handled by a trusted third-party e-commerce solution called BMT Micro whether they are made through Credit Card, Cash or Check. They have been selling shareware for over ten years and have taken orders of literally millions of customers worldwide. BMT Micro obtains your Credit Card information on secure SSL (Secure Socket Layer) connection, which is designed to provide government level security for your credit card transactions which means no one can intercept your payment information while you are making an order. With today's encryption technology, sending your Credit Card number to a Secure Server over the Internet is as safe as using your credit card in a restaurant or retail shop (probably even safer!)

▲ [See top](#)

Q16. Can I order via FAX, Phone, Mail, Purchase Order or Bank Wires?

If you prefer not to order online, you can send your payments via FAX, Phone, Mail, Purchase Order or Bank Wires. Please click 'Register' in the program and then click 'Buy Now'. You'll be able to see our FAX, Phone, Mail, Paypal and Purchase Order methods below. If you can't find information there, kindly visit our site and contact our customer support department.

▲ [See top](#)

Q17. What is the price of the full version of the program?

It costs only \$69.95 to own a full version of Copy Protect. Please note that this is a limited time offer. Prices can go up unexpectedly.

▲ [See top](#)

Q18. I can't afford the program? Can I have a discount?

We will give special discount coupons for users who have annual earnings of less than US \$20,000. If you are in this category, please contact us. Coupons are not available to users in the USA, Canada, UK, Australia and European countries.

▲ [See top](#)

Q19. Do you have any discounts for multiple licenses?

Yes, there are good discounts for multiple users purchasing multiple licenses, starting with a 15% discount for two users. Please check out our site for more information.

▲ [See top](#)

Q20. How many licenses must a single-user buy for multiple computers?

A single-user license allows the program to be run on ONE computer only.

▲ [See top](#)

Q21. Can I buy an academic license? Or a site license?

Yes, we offer special discount licenses for all types of organizations and academic institutions.

▲ [See top](#)

Q22. Can I send you the cash or the check through postal mail?

Yes, you can. To do that kindly read [Get Full Version > How to Buy?](#)

▲ [See top](#)

Q23. Do you guys accept cash currency of my country?

We accept cash currency of many countries. If you wish to pay through this method, please email BMTMicro, Inc. or RegNow, Inc., whichever you prefer, at jenni@bmtmicro.com or orders@regnow.com. Tell them the name of the product, your currency, the conversion rate of that

currency and ask whether they will accept it.

▲ [See top](#)

Q24. Why to buy multiple licenses for multiple computers?

It is very important that you get multiple licenses if you want to use the software on more than one computer. Using one license on multiple computers is an illegal activity.

How to Copy Protect Pictures?

Image theft is the unauthorized or illegal use of any image, photograph, graphic, cartoon, drawing, illustration or artwork. According to International Copyright Law, an image or the artwork belongs to the artist only who has created it; and permission is required to reprint or use that image. Unfortunately, there has been a great increase in image theft over the last few years mainly because many people don't bother about copyright laws.

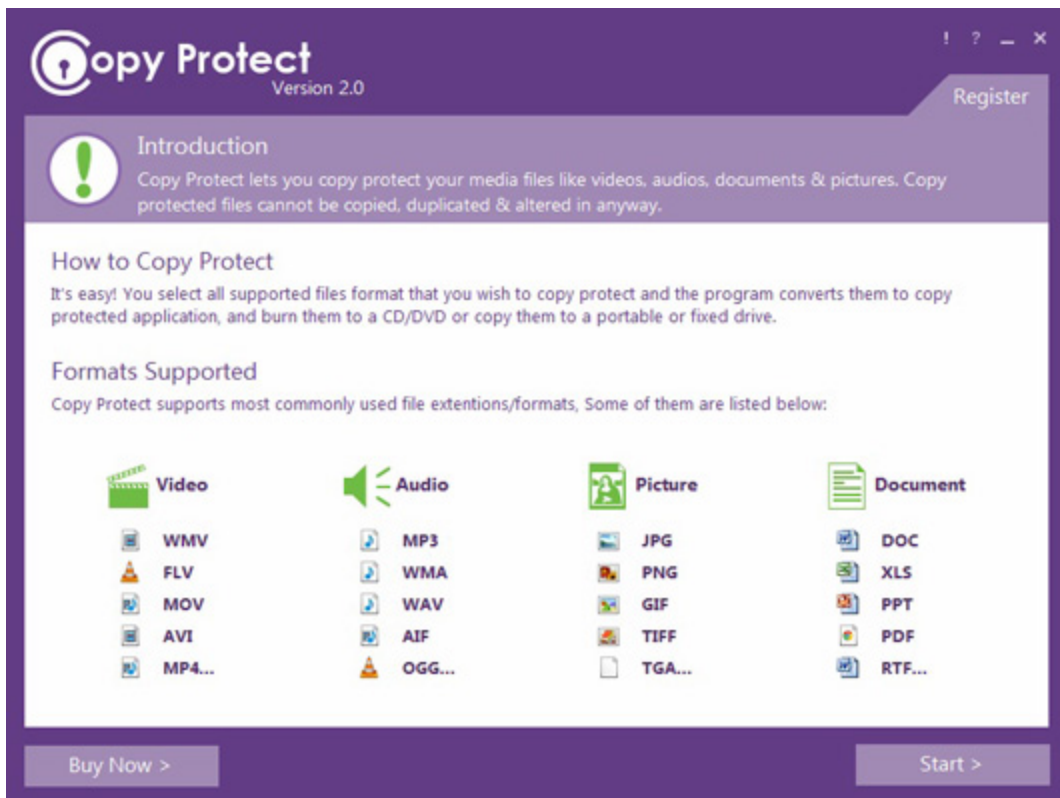

There is nothing more annoying than seeing your stolen images spread all the way through the internet or through CDs or DVDs, or by any other mean. No one wants their images get stolen and used by potential competitors, and therefore people use different methods to protect their images from being theft or stolen.

Since it can be very hard to track down the images illegally distributed over the internet or through CDs and DVDs, the best approach to prevent image theft is to protect your images in such a way that they can be used yet protected from theft.

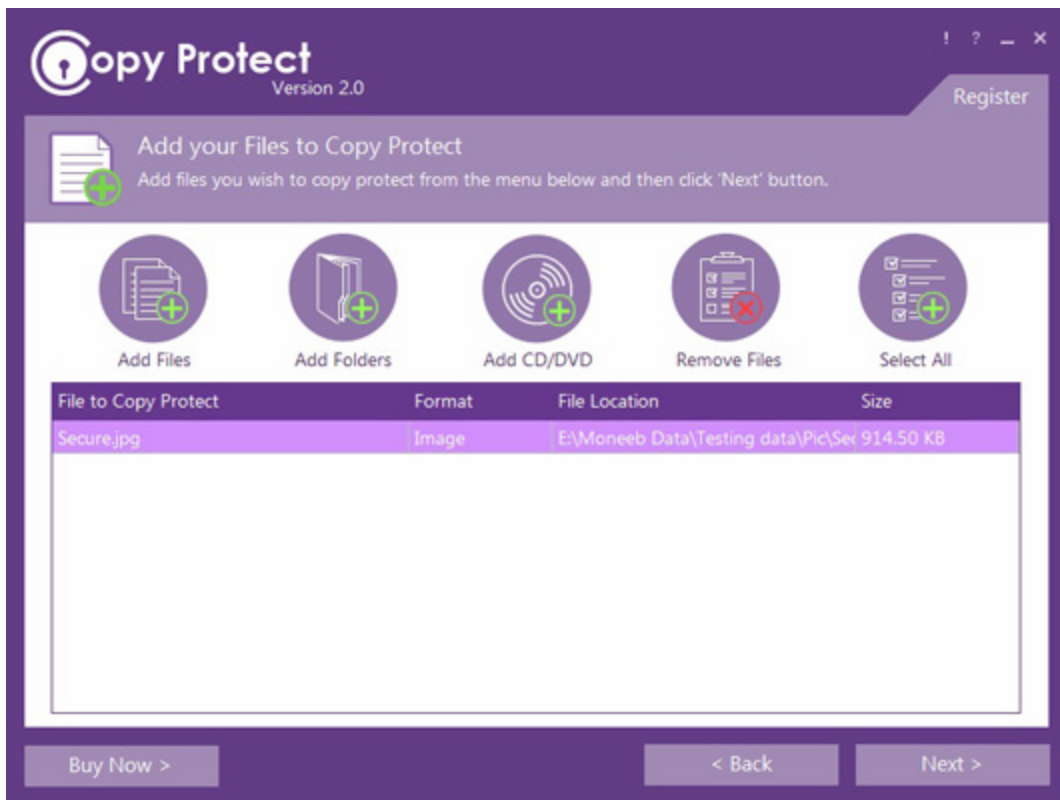

Copy Protect is a unique data copy protection software that lets you prevent image theft by letting you copy protect your images, photographs and digital artwork. It uses advanced multilayer copy protection technology that converts your images and other media files into copy protected executable applications which can be burned on CDs/DVDs. Once burned, you can freely hand over your CDs or DVDs without the fear of image theft.

Follow these simple steps to copy protect your images with Copy Protect:

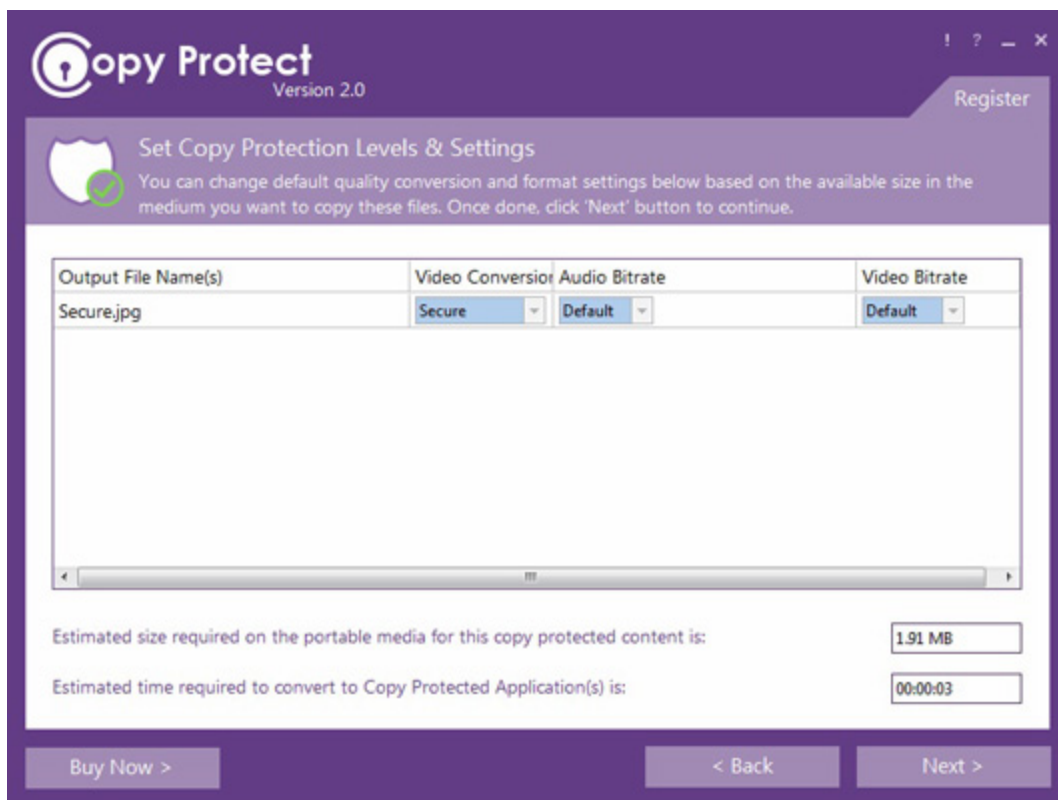

- Download Copy Protect and install it on your computer.
- Run the program and the Copy Protect Main Application Wizard will open.
- Click 'Start' button to commence the process of copy protection.

- From here, you can add your images, photographs, illustrations, drawing and digital artwork which you want to copy protect. The program will show you a list of files which you have added to Copy Protect along with their formats, file location and size.

- Now click 'Next' button.
- You rename your files by double-clicking on file name. This screen shows you estimated time required to convert files into copy protected applications along with the estimated size required on destination drive where you want to save these files.

- Click 'Next' button to continue.
- Now, select drive where you want to save your copy protected files. You can choose either a local drive location, portable drive location or a CD / DVD drive.
- The program also lets you choose burning option if you have selected a CD or DVD as your destination drive. You can choose the level of security you wish to obtain.

Note: Windows Vista & Windows 7 support both secure and highly secure burning methods while Windows XP only supports secure level of burning.

- Once burned, you can freely distribute this drive or CD/DVD to anyone without the fear of data being copied or duplicated without your permission.

How to Copy Protect Audios?

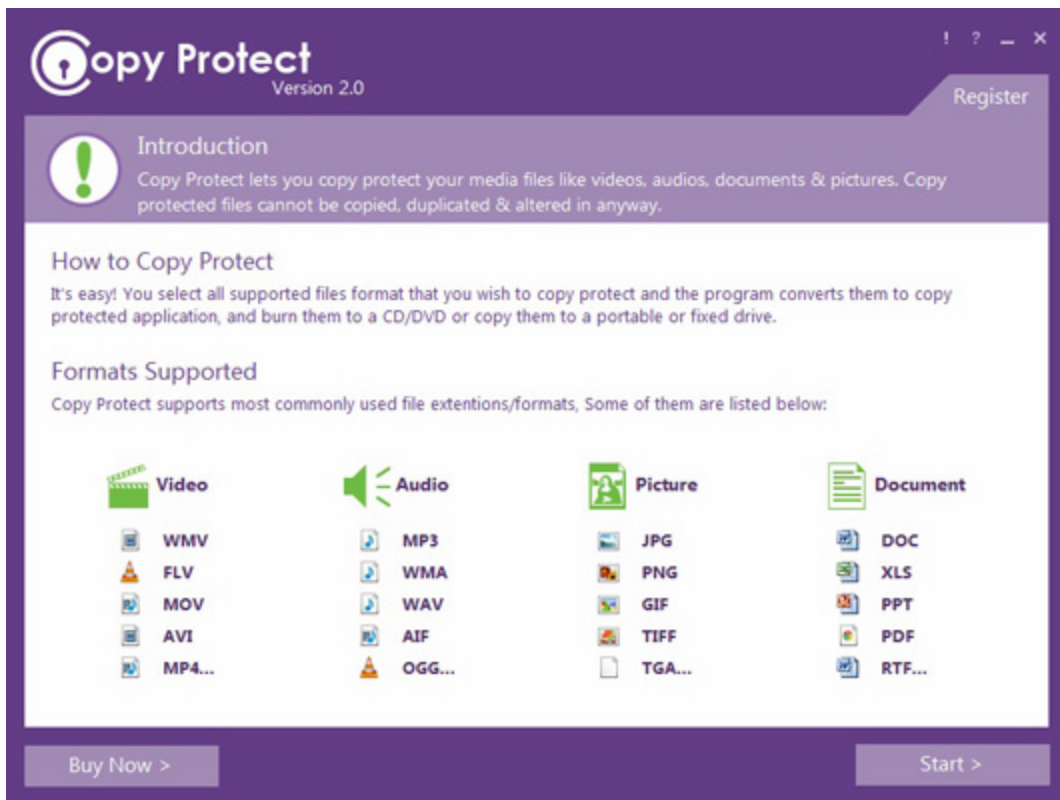

Copy protection is a technology that protects your media files and creative artwork from plagiarism, piracy, illegal distribution and copying. It is a much needed requirement since CD/DVD duplication and piracy has become a rampant business these days. Billions of dollars have been lost due to illegal piracy around the globe.

Musicians and singers continuously try to stop the progress of online piracy either by turning to lawyers or by encouraging their fans to buy original CDs rather than using pirated CDs. All these efforts have produced negligible effect on preventing piracy and illegal distribution of songs. Therefore, people from the music industry need a stronger protection system that can copy protect their music album.

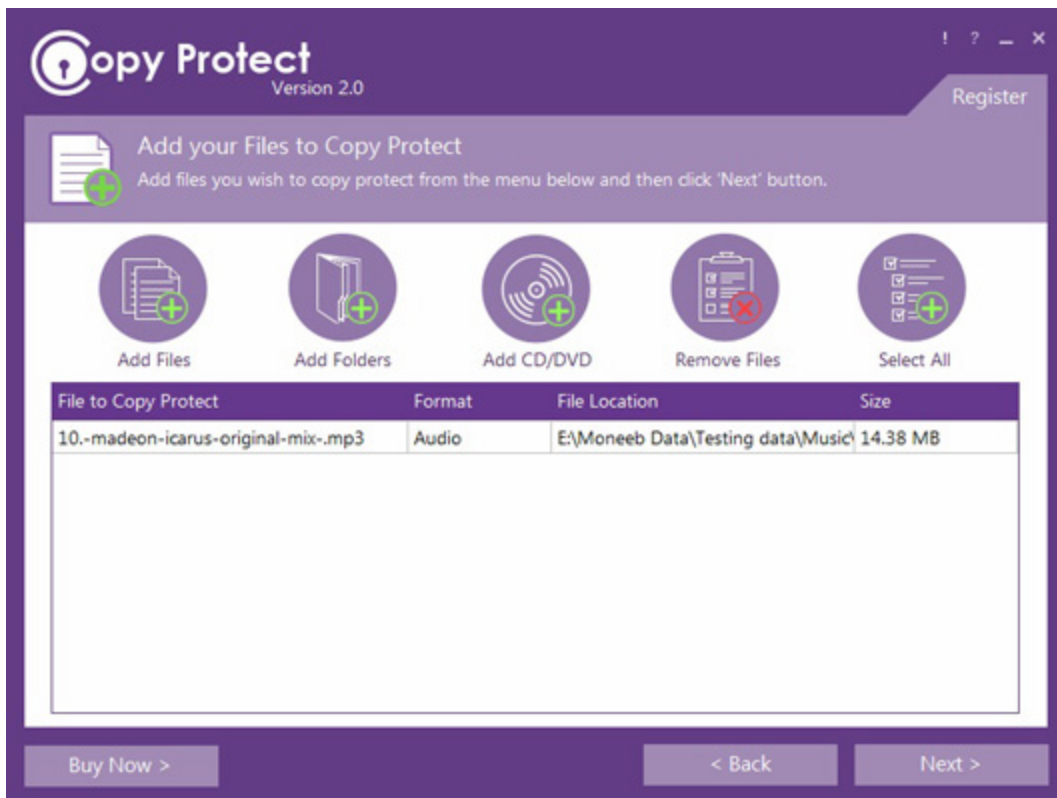

Copy Protect is a specialized data copy protection software that can copy protect all formats of audio files in such a way that you can share them with distributors without enabling them to copy your songs in any way. The program lets you convert your mp3, WMA and other audio files into copy protected executable application which can be burned on CDs and DVDs. Once burned, these copy protected files can only be run from the drive they are saved in. If someone tries to copy them to another location, these protected files will not run and become useless. In this way, Copy Protect prevents illegal distribution of your audio files.

Following is the step-to-step guide on copy protecting songs and other audio files:

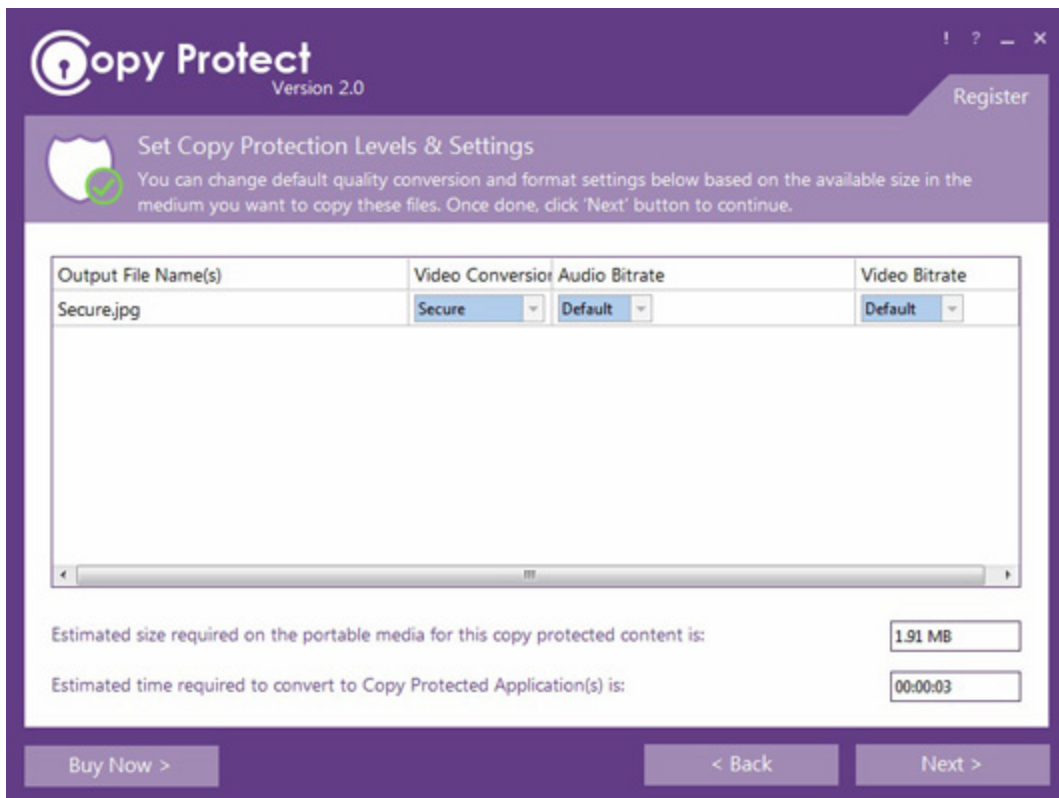

- Download Copy Protect and install it on your computer.
- Run the program and the Copy Protect Main Application Wizard will open.
- Click 'Start' button to commence the process of copy protection.

- From here, you can add your audio files which you want to copy protect. The program will show you a list of files which you have added to Copy Protect along with their formats, file location and size.

- Click 'Next' button to continue.
- You rename your files by double-clicking on file name. This screen shows you estimated time required to convert files into copy protected applications along with the estimated size required on destination drive where you want to save these files.

- Now, select drive where you want to save your copy protected files. You can choose either a local drive location, portable drive location or a CD or DVD drive.
- The program also lets you choose burning option if you have selected a CD or DVD as your destination drive. You can choose the level of security you wish to obtain.

Note: Windows Vista & Windows 7 support both secure and highly secure burning methods while Windows XP only supports secure level of burning.

- Once burned, you can freely distribute this drive or CD/DVD to anyone without the fear of data being copy or duplicated without your permission.

How to Copy Protect Videos?

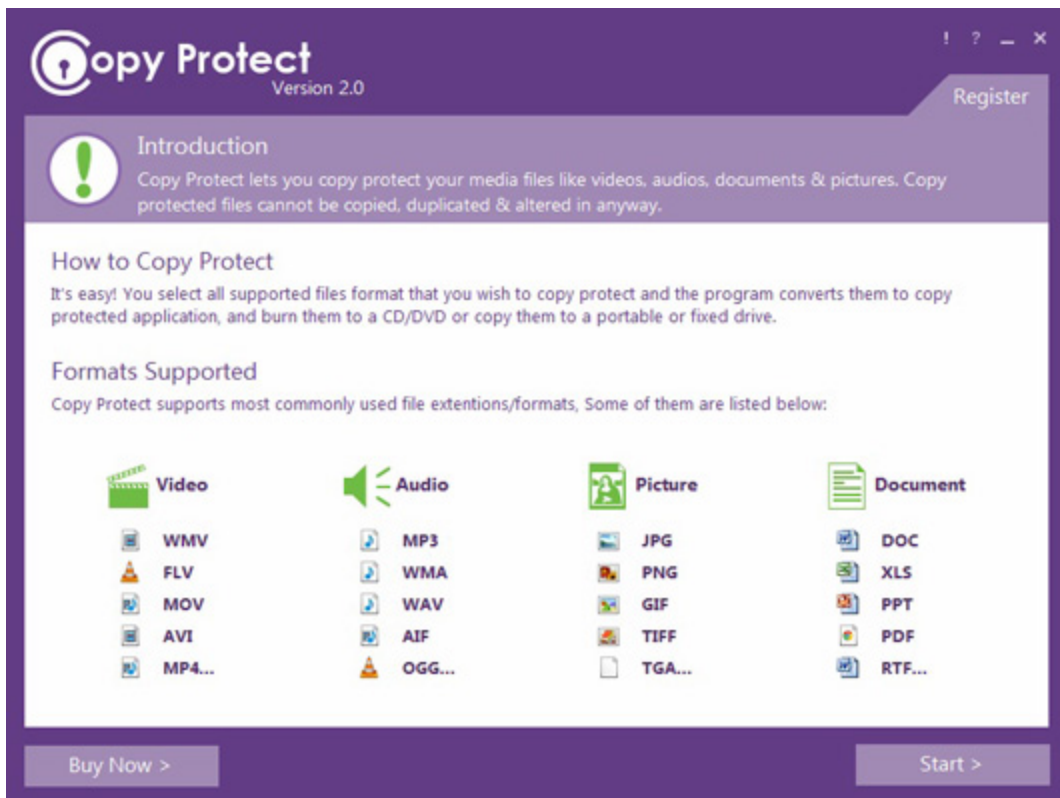

Whenever somebody steals something from you, you cannot take any action against it unless you know who did it. Same condition applies to your copyrighted videos and films. If your copyright videos are not protected against illegal copying, anyone can easily steal them and distribute them to anyone without your permission or authorization, and you cannot do anything for that because you don't know who has copied your video.

Piracy of videos and songs has become a rampant business. Only in America, an estimated \$18.2 billion in consumer dollars are lost each year as a result of illegal piracy around the world. The average profit on pirated intellectual content has made piracy more lucrative than drug running.

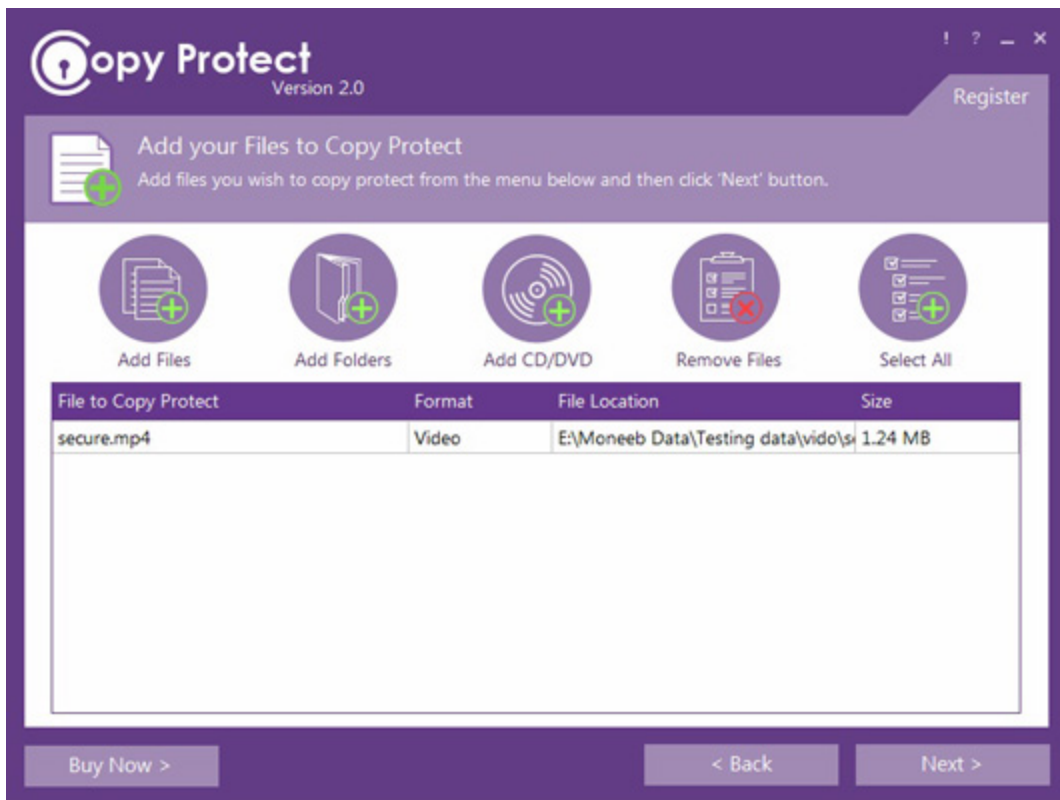

Copy Protect is a unique data copy protection software that copy protects all your media files including videos, audios, pictures and documents. The program converts your media files into copy protected executable applications which can be burned to CDs and DVDs, and can also be saved on USB drives and external drives. Once burned, these files can only be run from that particular drive. If someone tries to copy them to any other location, these files will not work and become useless. This feature allows you freely distribute your CDs or DVDs without the fear of data being copied or distributed illegitimately.

Follow these simple steps to copy protect your videos and movies:

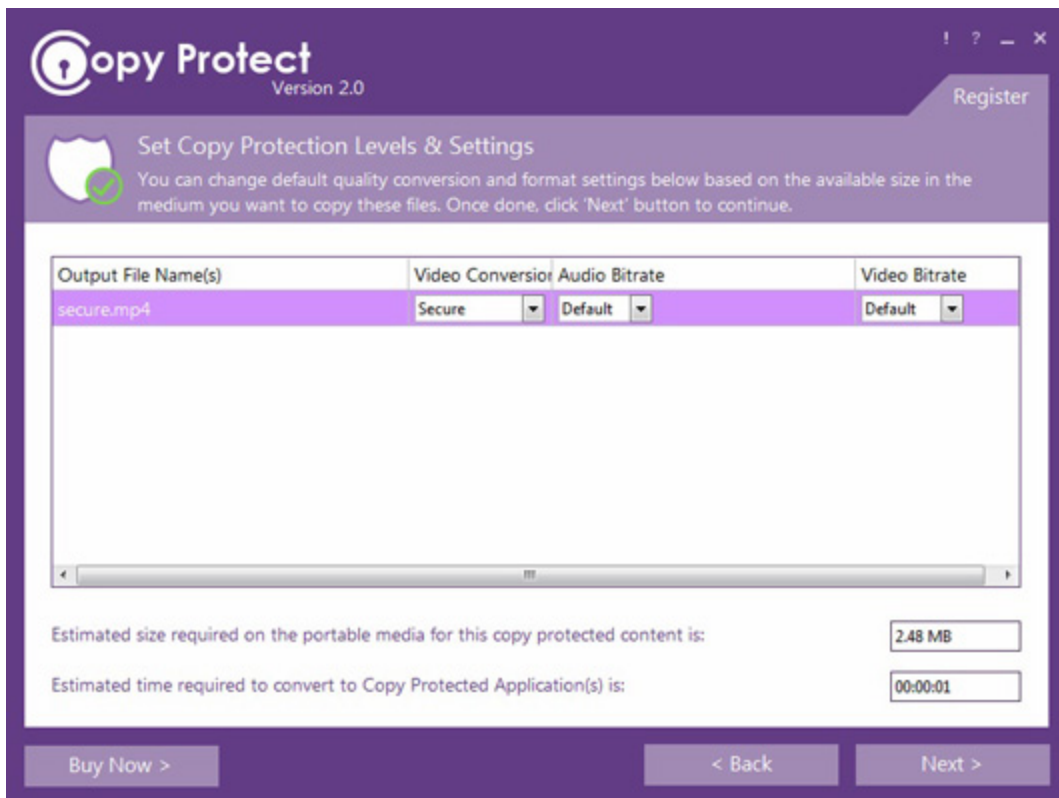

- Download Copy Protect and install it on your computer.
- Run the program and the Copy Protect Main Application Wizard will open.
- Click 'Start' button to commence the process of copy protection.

- From here, you can add your files, folders, CDs, DVDs and media files which you want to copy protect. The program will show you a list of files which you have added to Copy Protect along with their formats, file location and size.

- Now click 'Next' button to continue.
- You rename your files by double-clicking on file name. This screen shows you estimated time required to convert files into copy protected applications along with the estimated size required on destination drive where you want to save these files.

- Now, select drive where you want to save your copy protected files. You can choose either a local drive location, portable drive location or a CD or DVD drive.
- The program also lets you choose burning option if you have selected a CD or DVD as your destination drive. You can choose the level of security you wish to obtain.

Note: Windows Vista & Windows 7 support both secure and highly secure burning methods while Windows XP only supports secure level of burning.

- Once burned, you can freely distribute this drive or CD/DVD to anyone without the fear of data being copied or duplicated without your permission.

How to Copy Protect Document?

Imagine a scenario where a screenwriter who wrote his first script and sent it to producers but didn't hear back; and after a few months when he was watching a movie, he realized the story and characters that he created for his script were all flickering on screen. This is the reason why many writers are just too afraid of sharing their work with anyone. But if they don't share their screenplay with producers, they will not get paid for their work. Therefore, they need a way to share their creative artwork in such a way that other can read their story but cannot copy or distribute it without your permission.

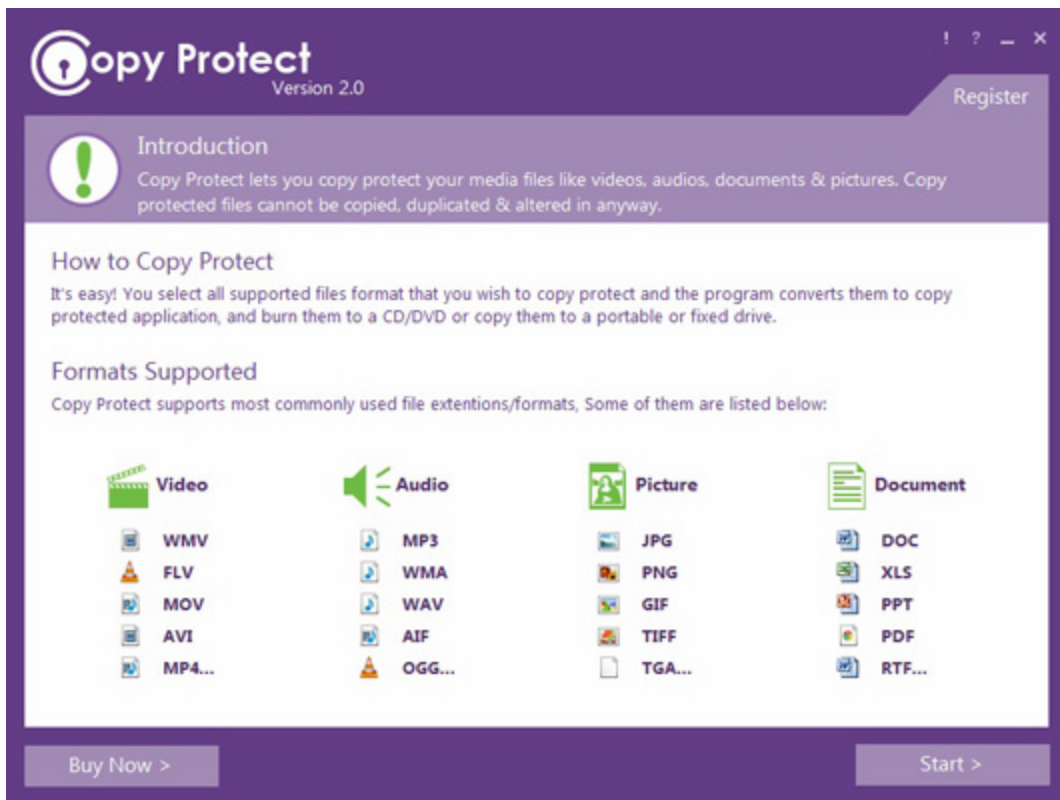

Copy Protect is a specialized data copy protection software that lets you copy protect your scripts, screenplays, stories, novels, poems, articles and other creative writing material or important documents. With Copy Protect, you can share our ideas with your peers without enabling them to copy your whole story.

Copy Protect works by converting your files into copy protected executable application using advanced multilayer copy protection technology which cannot be tampered in any way. Add files to Copy Protect that you want to protect from being copied illegally, select the drive or medium where you want to save these copy protected files and Voila!

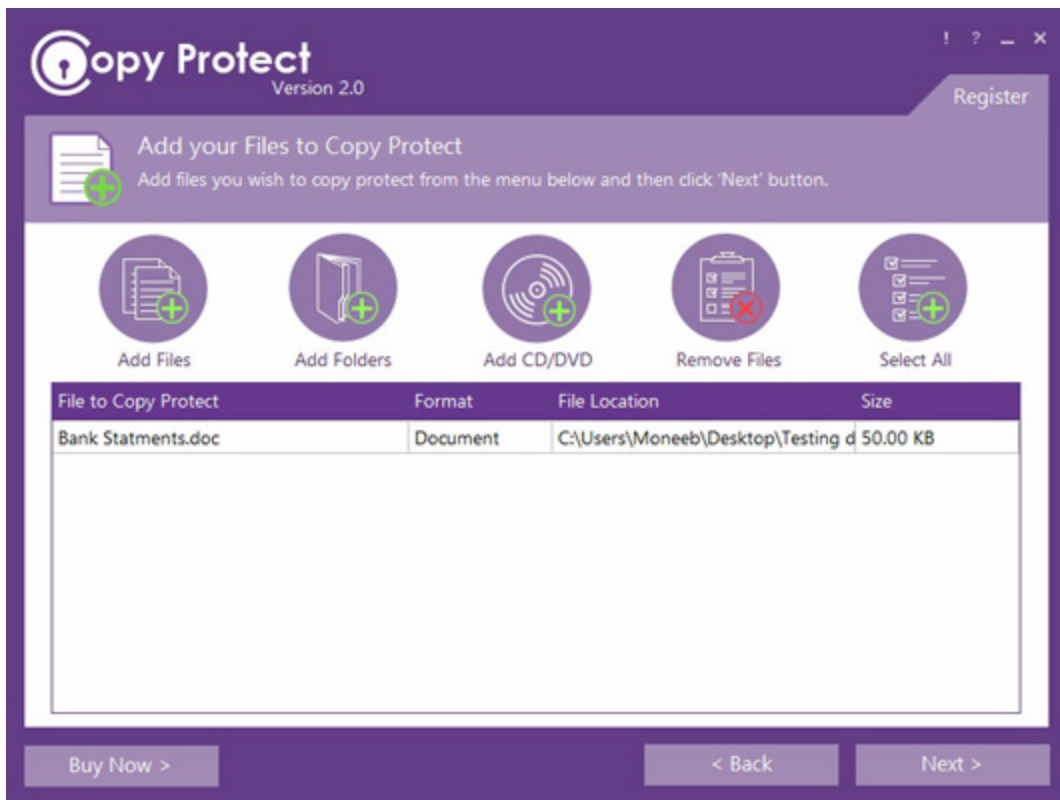

Copy Protect converts all supported formats into copy protected applications and burns them to a CD/DVD or copy them to a portable or fixed drive so that you can freely share this drive or CD/DVD with anyone without the fear of data being copied or stolen.

Follow these simple steps to copy protect your documents and files:

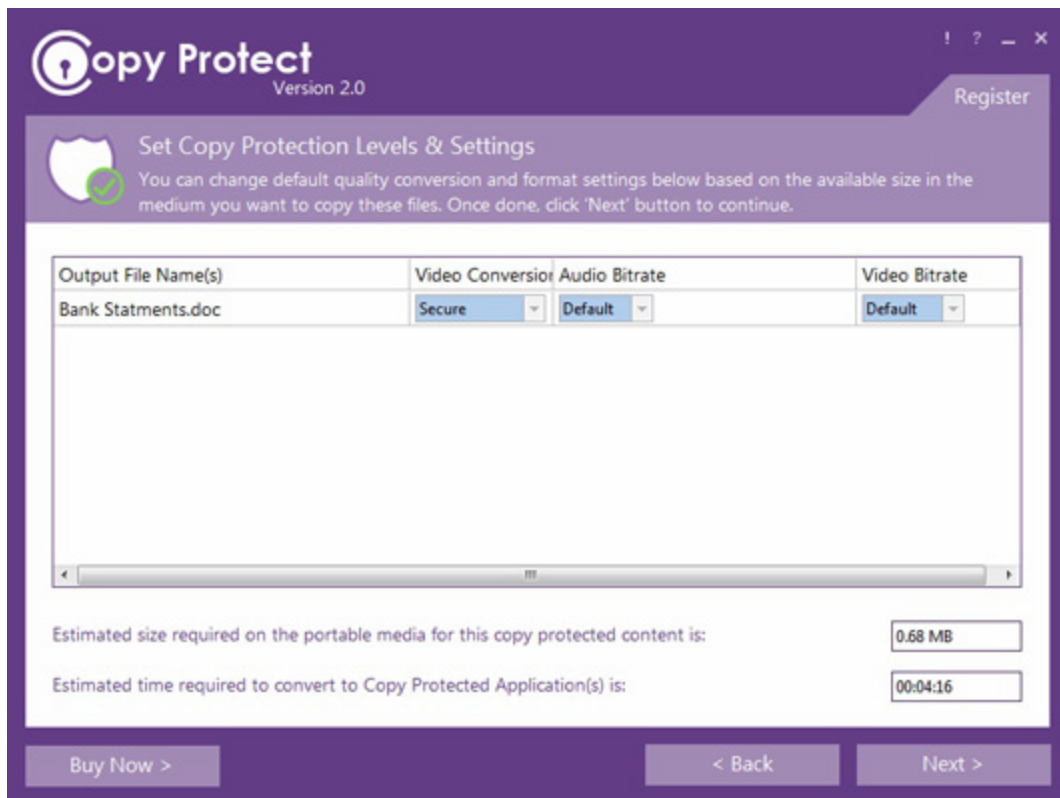

- Download Copy Protect and install it on your computer.
- Run the program and the Copy Protect Main Application Wizard will open.
- Click 'Start' button to commence the process of copy protection.

- From here, you can add your documents which you want to copy protect. The program will show you a list of files which you have added to Copy Protect along with their formats, file location and size.

- Now click 'Next' button.
- You can rename your files by double-clicking on file name. This screen shows you estimated time required to convert files into copy protected application along with the estimated size required on portable medium where you want to save these files.

- Click 'Next' button to continue.
- Now, select drive where you want to save your copy protected files. You can choose either a local drive location, portable drive location or a CD / DVD drive.
- The program also lets you choose burning option if you have selected a CD or DVD as your destination drive. You can choose the level of security you wish to obtain.

Note: Windows Vista & Windows 7 support both secure and highly secure burning methods while Windows XP only supports secure level of burning.

- Once burned, you can freely distribute this drive or CD/DVD to anyone without the fear of data being copied or duplicated without your permission.

Options:

Copy Protect lets you customize default quality conversion and format settings of your audios and videos based on the available size in the medium where you want to save or burn these files. You can access these options after adding files that you want to protect.

This screen of 'Set Security' has these columns:

Output Filename: Filename is editable so that if you want to change it you can easily do so.

Video Conversion: Two methods of video conversion are available i.e.; secure and highly secure that you can select from the drop-down list. By default secure method (fast) of video conversion is selected, however users can also select highly secure method.

Audio Bit Rate: Here you can change the bit rate for your audios from the drop-down menu.

Video Bit Rate: Here you can change the bit rate for your videos from the drop-down menu.

ETA – Time: This is the estimated time required to convert your media files into copy protected applications which is dependent on the video conversion method.

Why Multiple Licenses?

- To use Copy Protect on multiple computers, you need to purchase multiple licenses.
- Using a single user license for multiple computers is an illegal activity and if you do so, you will violate our license agreement.
- Each registered user will be able to upgrade to latest versions, which is not possible with single license.
- Each multiple licensed user will get priority customer support.
- Multiple licenses come with huge discounts, starting with a 15% discount for two users.
- Further discounts are available for site and academic licenses for multiple user licenses.
- Total peace of mind from security leaks and privacy breach.

End User License Agreement:

Copy Protect® - © Copyright 2001 - 2014 – NewSoftwares.net, Inc.

This license agreement ('License') is a legal agreement between you (either an individual or single entity) and NewSoftwares.net, Inc. By installing, copying or otherwise using any of our Products, you agree to be bound by the terms of this License. If you do not agree to the terms of this License promptly return the unused software to the place from where you obtained it for a full refund.

1. **EVALUATION PERIOD:** You may use a Shareware Copy of the Product for the evaluation, in order to determine whether the Product meets your needs before purchasing it. Once the evaluation period ends, you agree to either purchase a Registered Copy of the Product, or to stop using it.

2. **USE OF THE PRODUCT:** While you are evaluating the Product, you must NOT (a) defeat, or try to defeat, messages in the Product which encourage users to register; (b) modify or prepare derivative works of the Product; (c) reverse engineer, decompile or disassemble the Product; (d) modify any file that come with the Product.

3. **CHECKING REGISTERED STATUS:** You can determine whether this is a registered copy of the software or not by clicking the 'About' button in the software. If you find it written 'Unregistered', it means that the user is evaluating the product. Otherwise if you see 'Registered', it means that the user is running a registered version of the software.

4. **DISTRIBUTING SHAREWARE COPIES:** You may make copies of your unregistered Shareware Copy of the Product for distribution in CD/DVD or by other means, however you may not sell Shareware Copies of the Product for a profit. If you are a NewSoftwares.net, Inc. reseller or an affiliate, you have exclusive rights to sell the products in legal manner. People other than resellers and affiliates cannot distribute full versions, registration key, serial no., such a distribution will be considered Illegal and will be prosecuted to the maximum extent under the law. You CANNOT:

(a) distribute registered versions of Product if you're not a NewSoftwares.net, Inc. affiliate or a reseller

(b) ship incomplete versions of the Product

(c) defeat or try to defeat, messages in the Product which encourage users to register their software or actively discourage user registration in any way.

5. **TRADEMARKS, COPYRIGHTS AND PATENTS:** Copy Protect® is a registered trademark. Skin, source code and images are all copyrighted©. Caution: Please note that we take all kinds of infringements very seriously. Other product and company names in this document may be the trademarks of their respective owners and are hereby acknowledged.

6. **WARNING:** This product is protected by copyright laws and international treaties. Unauthorized reproduction or distribution of this program, or any portion of it, may result in severe civil and criminal penalties, and will be prosecuted to the maximum extent possible under the law.

7. LEGAL DISCLAIMER: NEWSOFTWARES.NET MAKES NO WARRANTY OR REPRESENTATION, EITHER EXPRESS OR IMPLIED, WITH RESPECT TO THE PRODUCT, INCLUDING ITS QUALITY, PERFORMANCE, MERCHANTABILITY, OR FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT WILL NEWSOFTWARES.NET BE LIABLE FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PRODUCT OR DOCUMENTATION, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.
